

Process dimensions/AIRR

- ▶ Replicate the examples of AIRR framework in funding organizations (e.g. EPSRC)
- ▶ Creation of institutes, observatories or groups based on an AIRR philosophy (e.g. SFIS of ASU, ORBIT, BrisSynBio, JNU vision 2020 and Beyond etc)
- ▶ Explore the creation of regional laws and regulations (e.g. Lombardy law on RI)
- ▶ Implement RRI principles in Doctoral training and in undergraduate levels
- ▶ Explore interdisciplinary forms of humanities/science collaborations e.g. arts, theatre etc.
- ▶ Incentivise public dialogues at a larger scale (e.g. synthetic biology dialogue, nanotechnology dialogue etc.)
- ▶ Reframed the notion of **Excellent science** to include RRI principles
- ▶ Review the **research assessment mechanisms** to reward RRI activities and interdisciplinary collaboration
- ▶ Allocate **more resources** in RRI activities in research projects
- ▶ Introduce more **flexibility** in the management of funded research projects (create the capability to 'respond' to external feedback during the projects)
